## EDUCATION

---

### University of Texas at Austin

Austin, TX

*Bachelor of Science in Computer Science, GPA: 3.50*

*Expected May 2026*

- Relevant Coursework: Algorithm Analysis, Data Structures, Computer Organization and Architecture, Computer Networks, Operating Systems, Object Oriented Programming, Discrete Mathematics, Linear Algebra, Game Programming Paradigms

### Scholarships/Awards:

- \* Texas Education Agency: Highest Ranking Graduate
- \* HackTX 2023: Best Pitch

## EXPERIENCE

---

### Mercor

Remote

*Software Engineer - LLM Evaluation*

*February 2025 – Present*

- Evaluated and analyzed AI-generated responses for accuracy, relevance, objectiveness considerations.
- Designed and refined structured evaluation rubrics to assess AI-generated responses.
- Worked with a team of 150+ evaluators and researchers to reduce flagged inconsistencies and inaccuracies in AI responses by 30%.

### Fretail Hackers

Austin, TX

*Software Engineer - Full Stack Developer*

*August 2024 – January 2025*

- Engineered full-stack features for Rodeo, a fully customizable hackathon registration system
- Developed front-end features for the HackTX website, a nationwide hackathon with 750+ participants
- Designed and implemented dynamic scrolling animations using Three.js, to enhance user engagement

## PROJECTS

---

### Unity DOTS Boids | *Unity DOTS, Visual Studio, C#*

- Programmed a simple Boids algorithm using Unity DOTS for greater performance
- Utilized Unity's Data Oriented Tech stack for an over 30x performance boost over standard Unity
- Learned about optimization techniques related to managing large set of data/entities such as octrees
- Implemented an obstacle avoidance system for more complex behaviour in different environments

### Unity Procedural Turtle | *Unity, Visual Studio, C#*

- Developed a animated turtle in Unity with procedural walking, tail flicking, and head aiming, plus moving shells
- Integrated 5 different procedural animation techniques to create immersive turtle behaviour
- Learned about the fundamentals of procedural animation and the related algorithms
- Implemented vector mathematics for smooth, natural-looking movement

### Unity Fun Shape Game | *Unity, Visual Studio, C#*

- Deployed a simple 2D platformer in Unity, producing all aspects of the game solo
- Created 10 unique levels each highlighting different gameplay mechanics
- Gained insight from play testers to discover the discrepancies between player experience and designer vision
- Learned to adapt behaviour of scripts to the limits and quirks of Unity

### Bank Heist Calculator | *Visual Studio, C#, .NET Framework*

- Developed a simple Windows Form app for HackTX that calculates time to complete a bank heist
- Pitched the project in front an audience of 300 for HackTX 2023 and won an award for best pitch
- Discovered more about C#, the .NET framework, Visual Studio, such as properties and controls of forms/elements
- Learned to accept certain trade-offs in design and functionality to ensure delivery at a strict deadline

## TECHNICAL SKILLS

---

**Languages:** C++, C#, Java, C, Python, HTML, CSS, JavaScript, Typescript

**Frameworks:** Svelte, Three.js, Node.js, Vue.js

**Developer Tools:** Git, Linux, PostgreSQL, Prisma, Vite, Unity, Unreal Engine
